- Multiplayer Go game following the instructions at [AppSignal blog](#): [Hayago](#)
- Restful API for book club-managing app [Levy API](#)
- Web scraper app [MalScrapper](#)
- OTP app to get file's metadata [Zaku](#)
- Phoenix LiveView app to filter out Twitch live streams [Teppelin](#)

A DAY OF MY LIFE

CAREER OBJECTIVE

Full-stack developer with +3 years of experience looking to switch gears from mainly UI development to a more server-side, business-logic kind of work

STRENGTHS & SKILLS

Self-taught person

Knowledge-hungry

Hard-working

Artificial Life & Evolutionary Computation

Front-end programming

Functional programming

Ruby

Elixir

JavaScript

LANGUAGES

Spanish

English

EDUCATION

B.Sc. Systems Engineering

Universidad del Valle

2011 – 2016

My education was a mixture of CS and Software Engineering. And my interest area as well as the focus of my degree project was in **Evolutionary Computation**. During my time in college I worked with languages like Racket (Scheme), C++, Java, Python and I spent over a year working with Ruby for my degree project
