- Phoenix LiveView tetris game [Tetris](#)
- A Telegram Bot written in Elixir to connect with Twitch API [Tepplin Bot](#)
- Elixir client for NASA's EONET Service [EonetEx](#)

A DAY OF MY LIFE

CAREER OBJECTIVE

Software engineer with +3 years of experience in Web development. I've worked mainly in front-end but I also have some experience with back-end technologies. I want to continue developing for the web and expanding my knowledge in the more business-logic side of things.

STRENGTHS & SKILLS

Self-taught person

Knowledge-hungry

Hard-working

Artificial Life & Evolutionary Computation

Front-end programming

Functional programming

Python

Ruby

Elixir

JavaScript

LANGUAGES

Spanish

English

EDUCATION

B.Sc. Systems Engineering

Universidad del Valle

2011 – 2016

My education was a mixture of CS and Software Engineering. And my interest area as well as the focus of my degree project was in *Evolutionary Computation*. During my time in college I worked with languages like Racket (Scheme), C++, Java, Python and I spent over a year working with Ruby for my [degree project](#)
